

CABLE STRIPPING TOOL: RCS1

Description:

The Partex RCS1 has been designed as an economical tool for the stripping of pvc & rubber insulation on round cable from 4mm to 25mm diameter.

The RCS1 features a spring loaded cable retention arm with integral chisel edge to aid in the removal of tough insulation.

The depth of cut is adjustable up to 3mm and the cutting blade can be rotated through 90 degrees by operation of a lever. This enables the tool to first complete a cut around the cable and then a longitudinal cut along the length.

Features:

Safe and easy to use.

End and mid span stripping.

Precision blade design for ease of cut.

Cutting blade depth adjustment prevents damage to conductors.

Blade direction lever for ease of blade rotation.

Application:

For stripping of PVC & Rubber insulations on round cables from 4mm to 25mm diameter.

Material Specification:

Retention arm:	Steel specification SPCC-SD/2.5T
Housing:	Polypropylene +15% glass fibre
Cylinder:	Steel specification SAE1215
Blade:	Steel Specification SK-4
